

# You can process the payment via a Wire Transfer

Please use the following information to wire funds to TransparentBusiness if affecting an INTERNATIONAL WIRE:

**Receiving Party Name:** TransparentBusiness, Inc.

**Name of Bank:** Citibank, N.A.

**Receiving Bank Address:** Citibank, N.A., USCC CITISWEEP, 100 Citibank DR, San Antonio, TX 78245

**Receiving Party Account number:** 6796571577

**Receiving Party Address:** 228 Park Avenue South, 16065, New York, NY, 10003

**Receiving Bank SWIFT number:** CITIUS33 or if 11 digits required CITIUS33XXX

## For domestic and international wires:

**Citibank ABA/Routing Number:** 021000089

At present, the United States does not participate in **IBAN**. A routing number is a nine-digit code used by financial institutions to identify other financial institutions. It's also known as an **RTN** (routing transit number) and an **ABA** (American Bankers Association) routing number. Combined with your account number, it allows institutions to locate your individual account. Each bank has a unique **SWIFT** code. It usually consists of 11 characters divided into four groups: first, four letters to identify the bank; second, two letters to identify the country; third, two letters to indicate the bank's location; and fourth (which is optional), three digits to specify the receiving branch. Routing numbers and **SWIFT** codes are distinct, although they both perform the same function. In the United States, banks are identified by their 9-digit **ABA** routing numbers, which makes it simpler to handle domestic payments. For international payments, bank branches are identified by **SWIFT** codes.
